Evidence-Based Medicine

Short Courses

2014-2015
Welcome

Tabriz University of Medical Sciences has traced back to 1947. Over more than 65 years, it has progressed to be ranked by national and international ranking organizations, as one of the Iranian top universities. Faculty of Medicine has more than seven teaching hospitals in Tabriz, in which fully equipped with advanced technology since 2004. We believe that when you study this short course you will be able to integrate Evidence-Based Medicine in your daily practice as you enjoy your time in our historical city.

http://ircebm-en.tbzmed.ac.ir
Iranian Evidence-Based Medicine Center of Excellence established as the first Iranian academic center aimed to integrate EBM into the process of patient care. Several extensive international courses and workshops provided for who wish to be involved as a leadership career in evidence based practice in medical schools, hospitals and health system.

Participants will train in clinical research methodology, randomized control trials, electronic database search strategies, critical approach of the published evidence, systematic reviews and meta-analyses, economic evaluation and guideline development.

Our center has a collaboration with clinical departments in Faculty of Medicine in which some joint programs holding in clinical departments including evidence-based journal clubs, evidence-based morning reports and evidence-based mortality-morbidity meetings.

We look forward to working with you to achieve our goals in good clinical practice.

Prof. Sakineh Hajebrahimi
Director of Iranian Evidence-Based Medicine Center of Excellence
Who we are

OUR MISSION

To produce the highest standard knowledge in evidence based medicine

OUR VISION

To integrate the best available evidence with health practitioners’ expertise in order to improve patient care and values.

OUR PROGRAMS

Starting with a question about participants’ clinical and academic work and continue with searching databases and critical appraisal of the retrieved evidences. The participants will be able to write a protocol for systematic reviews or cost analysis.
